

Combo Valve

- * **Best of Both:** Designed to combine the safety features of SafeLock with the fast-filling nature of JetFlow.
- * **Multi-use:** It can be used with all International Dunnage air guns, and most third party inflation systems.
- * **Fast flow:** Very fast inflation and deflation times. To reach optimum filling times, it is recommended to be used with our 'Mini JetFlow' or 'Monster' Air guns.
- * **Safe & Airtight:** It is spring-loaded for maximum protection.
- * **Multi-purpose:** It can be used on all dunnage bags levels.
- * **Reusable:** By turning the stem at a 90 degree angle clockwise and counter clockwise, the valve can be easily closed and opened.

Combo Inflator Tip

- * **User friendly:** By pressing the rim down on the valve it automatically snaps on and becomes airtight. .
- * **Durable:** It is inject molded out of advanced polymers to sustain it's durability and is long lasting.
- * **High Strength** – Can resist high pressures with ease.

An Aluminum version is also available.
